About Us

Al Rayan Steel is known for the quality of its products and services. Our organization and plants are quality certified and operate according to best business practices. Our company is a specialized piping contractor for steam, condensate, chilled water and compressed air. We have a inbuilt design team with in house installation team. We are specialized in the field of laundries, pharmaceutical industries, food and beverages, hotels and packaging industries. We also deal with all kinds of valves which comes on the above mentioned services.

Our services

Stainless Steel Fabrication

Al Rayan Steel is a quality, precision oriented custom fabrication company. Whether your custom project utilizes stainless steel, or steel, the sales engineers at Al Rayan Steel can work with you to produce the best product for your needs. Al Rayan Steel is committed to quality, using both time proven fabrication techniques along side state of the art technology to produce the right product for your needs. Al Rayan Steel is your premier, quality custom stainless steel fabricator.

MS Fabrications

Our Mild steel product range covers all aspects of this engineering discipline, utilizing quality materials and our experienced engineers. We comply with all CE marking requirements of BS EN 1090-2 and follow all procedure set out in our factory production control. As a result of this, our customers can be assured that our products

fabricated to the highest standards with full material traceability and all welders are trained and qualified to a high level.

Stainless Steel and GI Ducting work for HVAC

Al Rayan Steel provides a comprehensive range of customer-driven products and services in the fabrication and supply of GI ducts. We have been successful in maintaining the lead in the field of HVAC by keeping abreast with modern technology and latest expertise by installing latest machines. Your heating and air conditioning system just isn't working like it used to? Well, now you're now in the right place. Al Rayan Steel is the HVAC product and installation professionals!

Insulation and Cladding

Al Rayan Steel is a full-service mechanical systems insulation contractor specialized in industrial projects. No matter how large or complex the project is, Al Rayan Steel has the skilled technicians to complete the job safely, on time and within budget. Industrial insulation solutions saves industrial plant owner's money. From new construction to remodeling or cladding, Al Rayan Steel is the qualified insulation contractor for all types of insulation projects and Cladding.

Civil & Electrical Works

Al Rayan Steel is General Contractor offering a range of services. We take pride in offering the quality services at reasonable prices. Civil, Electrical and other works we provide to our clients with prompt, in professional manner and friendly service. Our goal has been to ensure the satisfaction of every customer,

while offering knowledgeable service, no matter how big or small the job.

Interior Designing & Turnkey Solution

At Al Rayan Steel we just bring to life the dreams and desires of our clients without very own trademark professional finishes and touches of luxury. We believe that every client we meet is totally unique and individual – so our interior designs can never be the same too. Our high quality goes very well with the luxury and the elegance, making a perfect combination.

PPR Piping

Al Rayan Steel is a company based in Sharjah. We are the sepecialized contractor for Steam, Condensate, Chilled Water, Compressed Air and Water Line. We have an inbuilt design team, Drawing and also the work excution team. We deliver the best quality work with a given time schedule.

S/S Cladding

Stainless steel cladding can help to create a range of styles, particularly clean, contemporary styles, and industrial, minimalistic styles. Steel wall cladding can be easily installed over many other materials, such as stucco, brick, concrete, or cinder blocks. Whether you need wall cladding, or any other architectural component to improve or modify your home, office, or workplace, stainless steel is an option worth looking into.
